Updates, Events & Activities

April 2026 • Vol. #1

Community Driven Movement to Democratize Intelligence

With a focus on democratizing intelligence, SCIP facilitated two engaging webinars and a 3-day workshop with certification during 2026, attended by participants from more than 12 countries comprising diverse professionals, interest groups, solution providers, researchers and entrepreneurs.

From March onwards, we had to shift our entire focus to designing and building the new interactive web platform **www.scip.world** to be launched in phases after May 15, 2026. This is the first major tech initiative by SCIP based on community feedback, extensive evaluation by our new team following interactions and surveys.

After phasing out decades-old systems, we are now all set to offer a more dynamic next-generation tech platform for events, eLearning, certified

courses, networking forums, alongside enhanced engagement of SCIP members, Chapters and the community at large.

We moved to a new domain for emails, phasing out the earlier scip.org. For contact and all queries related to events, courses, learning and membership, send an email to *info@scip.world* (instead of *memberservices@scip.org*) as indicated prominently in the current *www.scip.org* website that gets phased out.

Activating and Supporting SCIP Chapters Worldwide to Democratize Operations

We focus on more Chapter-driven local events, while activating and supporting model Chapters with resources, networks and speakers, among others. Two veteran SCIP leaders will coordinate with Chapter Presidents and offer our operations and branding templates.

There will be a global gateway for Chapters in the SCIP web platform for promotion, interaction and networking. For starting new Chapters, contact us for the operations and branding template.
